BEHAVIOUR ADVICE

Walking on lead

Did you know that a lot of dogs in Romania are caught by the Dog Catcher on a pole. This can be extremely traumatic for the dogs and can make them wary of things going around their neck.

This is why some Rommies can be very wary of a collar and a lead. Don't expect your dog to arrive and be absolutely fine being walked on a collar, they will need time to build trust in you and build their confidence.

Below is a still from a video of a poor dog caught at the Public Shelter when we visited earlier this year. its a tough watch but a good reminder that we need to give these animals time to build trust. They've had a tough start and need you to be patient.
